DIRECTORS' REPORT

The Directors of the Company are pleased to submit their report together with unaudited condensed interim unconsolidated and consolidated financial statements of the Company and the Group, respectively, for the guarter ended 30 September 2022.

ECONOMIC OUTLOOK

Pakistan closed FY22 at a GDP growth rate of 5.97% with consensus for growth forecasts for FY23 at 3.5% (World Bank) and FY23 average inflation at 20%. YoY inflation in June stood at 21.3% and the PKR was at 204.85/USD – forecasts for inflation and FY23 GDP growth rate were at 20% and 3.5% amidst a commodity upcycle and twin deficits with current account deficit at 3% and fiscal deficit of 4.7% of GDP.

As we step into Q2FY23, Pakistan has successfully negotiated re-entry into the suspended International Monetary Fund (IMF) program for which the government had initiated a multi-layered policy approach including import restrictions, further monetary tightening, and bridging expenditure gaps through taxation measures, however, just as Pakistan began to buckle up to face a difficult economic environment a climate catastrophe swept away homes, crops, livestock and infrastructure, leaving 33 million internally displaced with no means of sustaining themselves. The estimated damage is north of USD 40 billion and all economic forecasts mentioned above do not account for the impact of the climate crisis.

Inflationary readings remained high during the quarter peaking at a 14-year high of 27.3% during August and closing the quarter at 23.2% YoY. In continued monetary tightening the State Bank of Pakistan (SBP) raised rates by 125bps in July to 15%, however kept them unchanged at 15% in the following reviews of August and October 2022.

World Bank estimates put FY23 GDP at 2% against a market consensus of 1.5% to 2% amidst monetary tightening, high inflation, and growth contraction measures.

FUTURE OUTLOOK

The immediate short-term outlook is marred with uncertainty. High inflation, PKR devaluation, monetary tightening and measures undertaken to contract growth will impact ease and cost of doing business as well as profitability. On a national level, with weak macros, continued political uncertainty and the challenges we face in managing the impacts of the flood induced crisis – the immediate term outlook is bleak.

For Crescent Steel, with core business dependent on infrastructure projects — in particular energy and water infrastructure — FY23 is marred with uncertainty. Our order book in the line pipe segment, while promising, is linked with infrastructure projects of national importance and led by State Owned Enterprises and as such they are susceptible to delays — particularly given continued fiscal constraints.

The Greater Karachi Bulk Water Supply project K-IV has been awarded to an international contractor from whom we have received letter of intent (LOI). We are in the advanced stages of negotiating the contract for pipe conversion and line pipe coating business for part of the project. The project is expected to commence during H2FY23 with expected completion, by the end of financial year 2024.

We have also seen some line pipe demand in the Oil and Gas segment, specifically with regards to pipeline capacity augmentation projects; these are also in the final stages of bid evaluation. Our bid book in this segment is reasonably healthy—should these materialize in our favour the work would span H2FY23-Q1FY24. Our businesses in other segments will continue to provide tactical buffers including working capital support, however, we remain focused on capturing demand in the line pipe segment.

I would like to thank all stakeholders for their patronage and look for their continued support.

For and behalf of Board of Directors.

26. FINANCIAL RISK MANAGEMENT

The Company's financial risk management objectives and policies are consistent with those disclosed in annual unconsolidated financial statements of the Company as at and for the year ended 30 June 2022.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: Fair value measurements using quoted (unadjusted) in active markets for identical asset or liability.
- Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Fair value measurements using inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

The table below analyses financial instruments measured at the end of the reporting period by the level in the fair value hierarchy into which the fair value measurement is categorised:

27. FINANCIAL RISK MANAGEMENT

The Group's financial risk management objectives and policies are consistent with those disclosed in annual consolidated financial statement of the Group as at and for the year ended 30 June 2022.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1 : Fair value measurements using quoted (unadjusted) in active markets for identical asset or liability.

Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: Fair value measurements using inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

The table below analyses financial instruments measured at the end of the reporting period by the level in the fair value hierarchy into which the fair value measurement is categorised:
